LARGE LABOR TURNOVER IN HANDLOVA MINES -- Lidove Noviny, No 89, 15 Apr 49

The brown coal mines in Handlova continually achieve about only 75 percent of their plan, the principal cause being the great labor turnover. During March, 474 new employees were hired, but during the same month 436 left. Absenteeism is also very high. During March an average of 68 people were absent each day.
